Cleveland Clinic

INTERNATIONAL & EMERGING MARKETS | ADVISORY OFFERING PROFILE

Strategic Finance & Growth Advisory

An advisory offering that helps healthcare leaders decide which growth investments to pursue, and how to fund and sequence them.

CATEGORY	TYPICAL DURATION	DELIVERY MODEL
Finance Advisory: Plan Stage (deciding whether and how to invest)	4 to 12 weeks	Hybrid, Workshop-based

01 CLIENT NEED

New facilities, service lines, programs and market entries compete for limited capital and executive attention, and they are often advanced on enthusiasm rather than a clear financial picture. Boards, investors and government sponsors need to know whether an initiative is viable, which opportunities to pursue first, and how an approved plan will be funded and sequenced over several years.

This offering sits in the Plan stage of the Cleveland Clinic Healthcare Financial Advisory Lifecycle, which follows an organization's financial decisions through five stages: Plan, Measure, Optimize, Manage and Transform. The Plan stage covers deciding whether and how to invest, and answers the client question "Can we do this?" It is typically requested by new market entrants and organizations pursuing growth initiatives, new facilities or service line expansion. Scope ranges from a single business case to a full growth agenda.

02 CLEVELAND CLINIC VALUE PROPOSITION

This offering is delivered by Cleveland Clinic's Finance Advisory team. Cleveland Clinic is an operating health system with 23 hospitals, 300 outpatient locations and about 83,000 caregivers, and has grown from Northeast Ohio into Florida, Las Vegas, Toronto, London and Abu Dhabi (figures as of December 31, 2025).

Clients get business cases built and challenged against Cleveland Clinic's own experience planning, funding and opening new services, programs and facilities, in established and new markets. Volume ramps, staffing, reimbursement and capital needs reflect how hospitals actually run rather than desk-based assumptions.

Models are built with the client's finance team, every assumption is documented, and the work is handed over with a walk-through so the team can update it as plans change.

03 KEY DELIVERABLES

Each engagement is scoped from the modules below. A focused engagement may deliver a single business case; a full growth agenda includes all of them.

- **Market assessment:** written report and Excel-based demand model forecasting volumes by service, with the population, utilization and market share assumptions behind each forecast
- **Feasibility assessment:** written report on operational and financial viability, with the key risks and the conditions that must be met for success
- **Business case and pro forma:** Excel-based financial model over a multi-year horizon set at scoping, showing return on investment (ROI), net present value (NPV) and internal rate of return (IRR) under best, base and downside scenarios, with sensitivity analysis on the assumptions that most affect the result
- **Service line or new program analysis:** Excel-based model of volume, revenue, cost and staffing for each program evaluated
- **Investment prioritization matrix:** Excel-based scoring tool that ranks growth opportunities on agreed strategic and financial criteria, reusable for future decisions
- **Implementation roadmap:** phased, multi-year plan with milestones, dependencies, owners and the funding required each year
- **Executive presentation:** findings and a go or no-go recommendation for each opportunity, prepared for the board or investment committee

04 DELIVERY MODEL

Hybrid / Workshop-based

Delivered by Cleveland Clinic's Finance Advisory team, working alongside the client's finance lead. The engagement opens with a virtual kickoff and a structured data request, followed by interviews with key stakeholders. Analysis and modeling take place in weekly virtual working sessions, where interim findings are reviewed with the client team. It closes with an executive readout, on-site or virtual, and a handover of the models.

05 TYPICAL DURATION

4 to 12 weeks

- **Discovery (1 to 2 weeks):** Kickoff, structured data request, stakeholder interviews and agreement on the options and scenarios to be tested

- **Analysis and modeling (2 to 8 weeks):** Market, demand and financial models built and reviewed with the client team in weekly working sessions
- **Validation and readout (1 to 2 weeks):** Assumptions tested with finance and clinical leaders, recommendations finalized and presented at an executive readout, and models handed over

Where an engagement falls in the range depends mainly on the number of opportunities or options evaluated, the number of sites and service lines modeled, and how quickly complete market and financial data can be provided. A single business case with ready data sits at the low end; a multi-option growth strategy with an implementation roadmap sits at the high end.

06 RESOURCE REQUIREMENTS

CLEVELAND CLINIC TEAM

- Director / Executive Sponsor: 5 to 10% (larger engagements)
- Assistant Director / Engagement Lead: 10 to 25%
- Manager / Workstream Lead: 20 to 40% (mid-sized and larger engagements)
- Senior Analyst: 30 to 60%
- Analyst: 20 to 50%
- Admin / Project Support: up to 10%

CLIENT TEAM

- Executive sponsor with decision authority, for scoping, key reviews and the final readout
- Finance lead as day-to-day point of contact, attending the weekly working sessions
- Strategy, planning and service line leaders for interviews and to validate assumptions
- Data owners who can supply market, volume, financial and staffing information

Percentages are the share of each team member's working time during the engagement, so they do not add up to 100%. Roles marked for larger engagements join only when the scope calls for them.

ENGAGEMENT ASSUMPTIONS

- The client provides timely access to the financial, operational, market, volume, stakeholder, reporting and staffing information in the data request
- Scope and timing may change if data is late or incomplete
- Modules, scenarios and the projection horizon are confirmed at scoping
- Stakeholders are available for interviews and working sessions, and draft deliverables are reviewed within an agreed turnaround
- Recommendations are advisory; decisions and implementation remain with the client's leadership

07 EXPECTED OUTCOMES

- Leadership knows which growth opportunities are viable, and why, before committing capital
- The board or investment committee decides with support from validated data, documented assumptions, structured working sessions and clear decision-support materials
- Opportunities are ranked on consistent criteria, so the strongest go first
- An approved plan has a clear sequence, a funding requirement by year and an owner for each milestone
- The client's finance team can update the models and rerun scenarios as plans change, using the documentation and walk-through provided at handover
