Cleveland Clinic

INTERNATIONAL & EMERGING MARKETS | ADVISORY OFFERING PROFILE

Data, Analytics & Business Intelligence Advisory

Focused coaching to build a defensible measure set, trusted metric definitions and the data foundations leaders need to run the hospital.

CATEGORY	TYPICAL DURATION	DELIVERY MODEL
Digital & Technology Advisory	About 6 months	Virtual

01 CLIENT NEED

Hospitals often start with hundreds of candidate indicators but lack a focused, defensible first-year measure set, certified metric definitions, data governance and a clear analytics architecture. Teams may be strong in financial and operational reporting but less experienced in clinical analytics. Requests typically come from the CEO, CFO or Head of Data Analytics, triggered by a new hospital opening, accreditation goals such as JCI, or inconsistent numbers across clinical, finance and quality teams.

02 CLEVELAND CLINIC VALUE PROPOSITION

Cleveland Clinic's Enterprise Data & Analytics organization leads enterprise data strategy, data governance, platform engineering and analytics for one of the world's leading health systems. Engagements are led directly by Cleveland Clinic analytics executives in data strategy and governance and in analytic solutions, drawing on real Cleveland Clinic examples. Rather than handing over a library of documents, we coach client teams through the decisions that matter most and are hardest to reverse.

03 KEY DELIVERABLES

- Virtual advisory session series (typically up to six sessions)
- Recommendations on a tiered measure set (pre-opening, first year, full operations)
- Guidance on certified metric definitions, ownership and versioning
- Minimum viable data governance structure (committees, roles, documents)
- Architecture and integration guidance (EHR, revenue cycle, semantic layer)

- Analytics team design and competency recommendations
- Written feedback on client draft documents and session notes with action items

04 DELIVERY MODEL

Virtual

A series of 60-minute virtual coaching sessions, roughly every 3 to 4 weeks, led by Cleveland Clinic analytics leaders. Topics follow the client's priorities: day-one measure set, metric definitions and certification, data governance, technical architecture, analytics team design, and connecting KPIs to the data platform. Includes one round of light written review of client drafts. The International & Emerging Markets team schedules sessions, prepares agendas and issues notes and action items.

05 TYPICAL DURATION

About 6 months

Six 60-minute sessions approximately every 3 to 4 weeks, with light asynchronous review as client drafts become available. Sessions can be re-sequenced or consolidated within an agreed hour envelope.

06 RESOURCE REQUIREMENTS

CLEVELAND CLINIC TEAM

- International & Emerging Markets relationship manager (scheduling, agendas, notes, action tracking)
- Cleveland Clinic data strategy and governance leader
- Cleveland Clinic analytic solutions leader
- Guest SMEs for architecture and EHR integration sessions

CLIENT TEAM AND INPUTS

- Executive sponsor (CEO or CFO)
- Head of Data Analytics and analytics team
- Draft KPI framework, metric definitions and integration plans
- Quality, finance and IT representatives for relevant sessions

07 EXPECTED OUTCOMES

- Focused, defensible first-year measure set aligned to leadership priorities and accreditation
- Certified metric definitions with clear ownership
- Minimum viable data governance in place before go-live
- Architecture and integration decisions that avoid costly rework

- Right-sized analytics team plan for opening and growth
