Cleveland Clinic

INTERNATIONAL & EMERGING MARKETS | ADVISORY OFFERING PROFILE

Digital Hospital Activation & Readiness

Cleveland Clinic's proven activation playbook to bring people, processes and technology to a safe, on-time digital go-live.

CATEGORY	TYPICAL DURATION	DELIVERY MODEL
Digital & Technology Advisory	12 to 18 months (aligned to go-live)	On-site, Virtual, Hybrid

01 CLIENT NEED

Opening a new hospital or switching major systems is high risk: build, testing, training and cutover must come together on a fixed date. Many organizations lack a structured governance model, a disciplined way to track risks, issues and decisions, or objective readiness checkpoints. Requests usually come from the CEO, COO, CIO or program director, triggered by an upcoming opening, a major system migration or a struggling implementation.

02 CLEVELAND CLINIC VALUE PROPOSITION

Cleveland Clinic activates its own new facilities and systems using a standard Global Design, an Activation Playbook and structured localization. Across 9 major implementations in 3 years, 94% of caregivers were trained before go-live, more than 13,000 caregivers were trained, about 1,500 caregivers served as EHR champions, more than 12,000 devices were deployed and integrated, and 574 lessons learned were processed. Clients gain a proven governance model, the RIDAC discipline for managing risks, issues, decisions, actions and changes, and objective go-live readiness checkpoints.

03 KEY DELIVERABLES

- Initial due diligence and high-level timeline
- Activation plan aligned to an ideal greenfield timeline (from about 15 months before go-live)
- Project governance and RIDAC (risks, issues, decisions, actions, changes) set-up
- Status reporting and communications plan templates

- Validation, testing and training plan review
- 90/60/30-day go-live readiness assessments
- Cutover, go-live support and stabilization recommendations

04 DELIVERY MODEL

On-site / Virtual / Hybrid

Remote due diligence and plan reviews, with recurring virtual advisory sessions aligned to the activation timeline. Cleveland Clinic experts review governance, build validation, testing, training and cutover plans and join readiness checkpoints. In-person readiness walkthroughs or command center visits are recommended for the highest-risk milestones.

05 TYPICAL DURATION

12 to 18 months (aligned to go-live)

Plan and pre-work (about T-15 months); validation and build (about T-12 months); deploy and test; training (from about T-6 months); operational readiness (about T-4 months, with 90-day assessment); cutover and go-live (60/30-day assessments); stabilize and optimize (up to about 3 months after go-live).

06 RESOURCE REQUIREMENTS

CLEVELAND CLINIC TEAM

- International & Emerging Markets engagement lead
- IT activation / program management SME
- Testing, training and operational readiness SMEs
- Infrastructure SME as needed

CLIENT TEAM AND INPUTS

- Executive sponsor and steering committee
- Program and project managers
- Application, infrastructure and training teams
- EHR champions and operational leads
- Project plans, timelines and status reports

07 EXPECTED OUTCOMES

- Clear governance and decision-making through go-live
- Objective, milestone-based go-live readiness
- High caregiver training completion before go-live

- Smoother go-live and faster stabilization
