Cleveland Clinic

INTERNATIONAL & EMERGING MARKETS | ADVISORY OFFERING PROFILE

Clinical Training, Fellowships & Research Programs

Supervised clinical rotations, subspecialty fellowships and research training at Cleveland Clinic and Cleveland Clinic Abu Dhabi for trainees and physicians who meet program requirements.

CATEGORY	TYPICAL DURATION	DELIVERY MODEL
Education & Training	4 weeks to 3 years, by program	On-site

01 CLIENT NEED

Physicians and trainees seeking training beyond observation need supervised clinical rotations, subspecialty fellowships or formal research experience, each with strict eligibility, credentialing and visa requirements. Best fit for enrolled trainees, post-residency and international physicians pursuing advanced clinical or research training, and students seeking exposure to clinical research methods.

Intended audience: Health profession students and interns, residents and fellows in accredited programs, and physicians who have completed residency. Availability for external clients varies by program and may require program approval.

02 CLEVELAND CLINIC VALUE PROPOSITION

Cleveland Clinic and Cleveland Clinic Abu Dhabi offer structured training pathways that combine supervised clinical practice, inpatient and outpatient exposure, research and quality improvement, with defined learning objectives and specialty-specific academic requirements.

Programs range from a four-week clinical elective or research placement to multi-year subspecialty fellowships, giving participants advanced skills and research capability beyond core training.

03 KEY DELIVERABLES

- CCAD Clinical Elective. Enrolled students, interns, residents and fellows; 4-week supervised rotation with limited patient care in anesthesiology, critical care, emergency and hospital medicine, infectious

diseases, pulmonology or imaging

- CCAD Medical Fellowship Programs. Post-residency physicians; 2 to 3 years in Cardiology, Gastroenterology, Vascular Surgery, Critical Care or Hematology/Oncology
- Hospitalist Fellowship (NST). International physicians; about 1 year of non-accredited advanced hospital-medicine training with research and quality improvement
- Pediatric Internal Medicine Fellowship (NST). International physicians; about 1 year of non-accredited advanced pediatric training with research and quality improvement
- Clinical Research Fellowships. Physicians; 1 year or longer of paid research training in clinical research methods, innovation and evidence-based practice
- CCAD Research Student Program. University students and interns; 4-week placement supporting a CCAD-approved research project, without patient care

04 DELIVERY MODEL

On-site

Format: In-person supervised clinical training, fellowship or research placement

Location: Cleveland Clinic (United States) and Cleveland Clinic Abu Dhabi

Offering type: Program

Customizable: NST fellowships only; other programs follow a fixed structure

05 TYPICAL DURATION

4 weeks to 3 years, by program

CCAD Clinical Elective and CCAD Research Student Program: 4 weeks. Hospitalist and Pediatric Internal Medicine Fellowships (NST): about 1 year. Clinical Research Fellowships: 1 year or longer. CCAD Medical Fellowships: 2 to 3 years depending on specialty, with academic cycles beginning in January. Availability of U.S. fellowships to external clients requires program approval and is to be confirmed.

06 RESOURCE REQUIREMENTS

CLIENT TEAM AND INPUTS

- CCAD Clinical Elective: visit visa, plus specialty and institutional approval
- CCAD Medical Fellowships: credential verification, licensing and a work visa
- Hospitalist and Pediatric Internal Medicine Fellowships (NST): USMLE and ECFMG requirements, program approval and a 1-month preceptorship
- Clinical Research Fellowships: GME requirements and J-1 visa eligibility
- CCAD Research Student Program: visit visa and an approved research project
- Program fees: to be confirmed

07 EXPECTED OUTCOMES

- Supervised, hands-on clinical skill development
- Advanced specialty skills beyond core training
- Strengthened research capability and evidence-based practice
