INTERNATIONAL & EMERGING MARKETS | ADVISORY PRODUCT PROFILE

Integrated Financial Planning, Forecasting & Modeling

Driver-based financial models and planning processes that link volumes, revenue, staffing and capital to budgets, multi-year forecasts and integrated financial statements.

CATEGORY	TYPICAL DURATION	DELIVERY MODEL	PRODUCT OWNER
Finance Advisory: Manage Phase	2 to 12 weeks per module; 12 to 20 weeks for the full toolkit	Hybrid, Workshop-based	IEM Finance Advisory Connected & Advisory Services

01 CLIENT NEED

Volume assumptions drive nearly every downstream plan, from staffing and physician compensation to revenue, capital and cash. Yet many organizations plan with one-off spreadsheets that cannot be reused, audited or scenario-tested, budget processes that are lengthy and disconnected from operations, and assumptions that are undocumented or inconsistent. Boards and executives need an integrated, driver-based view of the plan that shows whether it is affordable, how it responds to change and how it will be managed through the year.

The offering sits within the Manage phase of the Cleveland Clinic Healthcare Financial Advisory Lifecycle, which answers the client question "How do we improve planning and decision-making?" It is typically requested by multi-site organizations and providers facing budgeting or forecasting challenges.

02 CLEVELAND CLINIC VALUE PROPOSITION

Cleveland Clinic's financial planning and analysis practices support planning, budgeting and forecasting across a large and complex academic health system. Our advisors build models and processes around the operational drivers that matter in healthcare, reflecting how volumes, reimbursement, staffing and capital interact in real hospital operations.

Clients receive transparent, well-documented models and assumptions that leadership can understand and challenge, and that their own teams can own, update and extend long after the engagement ends.

03 KEY DELIVERABLES

- Volume and demand model by service line, with offering phasing and a ramp-up schedule
- Revenue and reimbursement model built on chargemaster pricing, payer mix and contract terms
- Staffing and workforce cost model, including organizational design and physician compensation scenarios
- Integrated three-statement model (P&L, cash flow and balance sheet) with scenario toggles and an output dashboard
- Assumptions workbook covering inflation, service mix, pricing and recruitment, with sources, owners and update cadence
- Scenario and sensitivity package with best, base and downside cases, tornado and break-even analysis
- Operating budget package and redesigned budget process, with templates, roles and calendar
- Multi-year forecast (3 to 10 years) with a predictive forecasting approach and accuracy tracking
- Capital plan with prioritization framework, ROI analysis, request process and capitalization policy recommendations

04 DELIVERY MODEL

Hybrid / Workshop-based

Design workshops establish model structure, drivers and assumptions with finance leadership. The model or process is then built iteratively, with regular virtual review sessions and validation against historical results. The engagement closes with training and documentation so the client team can own and update the work. Components are modular, so clients can start with a single model or analysis and extend to the full integrated toolkit.

05 TYPICAL DURATION

2 to 12 weeks per module; 12 to 20 weeks for the full toolkit

Typically delivered in three phases: design and assumption setting; model or process build with iterative review; validation, training and handover. Focused analyses such as a scenario package, operating budget or capital plan run 2 to 6 weeks, and individual driver or statement models run 6 to 12 weeks. The full integrated toolkit is phased over 12 to 20 weeks, building volume and revenue drivers first. Final timing depends on data availability and scope.

06 RESOURCE REQUIREMENTS

CLEVELAND CLINIC TEAM

- Director / Executive Sponsor: 5 to 10%
- Assistant Director / Engagement Lead: 10 to 25%
- Manager / Workstream Lead: 20 to 40%
- Senior Analyst: 30 to 60%
- Analyst: 20 to 50%
- Project Support: as needed

CLIENT TEAM AND INPUTS

- Executive sponsor with decision authority
- Finance lead or day-to-day point of contact
- Access to historical volume, revenue, staffing and financial data
- IT or data team support for system extracts
- Stakeholder availability for interviews, working sessions and reviews
- Timely review and feedback on draft deliverables

07 EXPECTED OUTCOMES

- Defensible, documented assumptions that anchor every financial plan
- Integrated three-statement view of profitability, cash and financial position for financing and board review
- Faster scenario testing, with a clear view of downside exposure and the assumptions that matter most
- Shorter, more accurate budget cycle with operational ownership of targets
- Prioritized capital plan aligned to funding capacity, supported by a consistent request and approval process
- Client team equipped to maintain and update the tools delivered
