Cleveland Clinic

INTERNATIONAL & EMERGING MARKETS | ADVISORY PRODUCT PROFILE

AI Governance & Responsible AI

Establish the governance, policies and review process to adopt AI safely, ethically and at pace.

CATEGORY	TYPICAL DURATION	DELIVERY MODEL	PRODUCT OWNER
Digital & Technology Advisory	8 to 12 weeks	Virtual, Hybrid, Workshop-based	Jenny Owens, AIGP Senior Director

01 CLIENT NEED

AI tools are entering hospitals quickly through vendors, platforms and staff experimentation, often without a clear process for review, approval or monitoring. Leaders worry about patient safety, bias, privacy, cybersecurity and regulatory exposure, while wanting to benefit from use cases such as documentation support. Requests usually come from the CEO, CMIO, CIO or compliance leaders, triggered by a proposed AI deployment, unmanaged shadow AI or upcoming regulatory and accreditation expectations.

02 CLEVELAND CLINIC VALUE PROPOSITION

Cleveland Clinic has operated a multidisciplinary AI Task Force since 2021, bringing together clinical, informatics, data science, legal, bioethics, compliance, cybersecurity, IT and quality leaders to ensure responsible use of AI in healthcare. Our approach is aligned to the NIST AI Risk Management Framework (Govern, Map, Measure, Manage), and covers internally developed, vendor, platform-native and organic AI. Clients learn from a working intake, review, approval and monitoring process designed to enable innovation rather than slow it down.

03 KEY DELIVERABLES

- AI governance model and multidisciplinary committee design
- Core principles and AI policy recommendations
- AI use-case intake and review process (including model documentation)
- AI inventory / registry approach, including shadow AI
- Bias review and ongoing monitoring framework

- Staff training and patient transparency recommendations

04 DELIVERY MODEL

Virtual / Hybrid / Workshop-based

Virtual best-practice sessions with Cleveland Clinic AI governance leaders, review of the client's AI policies and current use cases, and written recommendations. An optional in-person AI governance roundtable or tabletop review of live AI use cases.

05 TYPICAL DURATION

8 to 12 weeks

Phase 1 Current AI landscape and governance review; Phase 2 Governance, policy and process design; Phase 3 Monitoring framework and readout. Optional ongoing advisory as use cases are reviewed.

06 RESOURCE REQUIREMENTS

CLEVELAND CLINIC TEAM

- IEM engagement lead
- AI governance SME (AI Task Force leadership)
- Supporting SMEs as needed (data science, bioethics, legal/compliance, cybersecurity)

CLIENT TEAM AND INPUTS

- Executive sponsor (CEO, CMIO or CIO)
- Inventory of current and planned AI use cases
- Existing data, privacy and IT policies
- Clinical, legal/compliance and IT representatives

07 EXPECTED OUTCOMES

- Functioning AI governance body with clear roles and decision rights
- Standard intake and approval process for all AI use cases
- Visibility of all AI in use, including shadow AI
- Ongoing monitoring for performance, bias and unintended impacts
- Readiness for emerging regulatory and accreditation expectations
