Education

Simulation & Advanced Skills Training

Customizable simulation-based education, systems testing and program development from Cleveland Clinic's Simulation and Advanced Skills Center and Cleveland Clinic Abu Dhabi.

Category	Typical duration	Delivery model
Education & Training	Single session to multi-phase engagement	On-site, Workshop-based

Client need

Professionals and teams need to practice procedures, teamwork and life support safely, and organizations building their own simulation capability need help with curriculum, systems testing, accreditation readiness and faculty development.

Questions we help you answer

- How can our teams practice procedures and emergencies safely?
- Are our new spaces, systems and workflows ready for patients?
- How do we build a simulation program of our own?

What you receive

- Simulation courses in procedural skills, team scenarios and life support, by specialty
- Workforce upskilling and in situ training at Cleveland Clinic or the client site
- Systems testing of clinical systems, spaces and workflows
- Simulation program design, accreditation readiness and train-the-trainer support
- Simulation-based training in Abu Dhabi for licensed professionals, single session to multi-day

How it works

Format: In-person simulation-based training and advisory

Location: Cleveland Clinic, Cleveland Clinic Abu Dhabi or client site

Expected outcomes

- ✓ Practical skills participants apply at home
- ✓ Improved patient safety and team performance
- ✓ Tested clinical systems, spaces and workflows
- ✓ Sustainable local simulation capability
