Digital Tools & Analytics

Digital Strategy & Roadmap

A phased digital roadmap that aligns your technology investments with your clinical ambition, capital plan and opening timeline.

Category	Typical duration	Delivery model
Digital & Technology Advisory	8 to 12 weeks	Virtual, Hybrid, Workshop-based

Client need

Hospital leaders often have an ambitious clinical vision but no single, sequenced plan for the technology needed to deliver it. Greenfield projects need digital decisions tied to design and construction milestones before costly choices are locked in. Existing hospitals face fragmented systems and competing priorities with no clear view of where they stand. Requests typically come from the CEO, CIO or board, triggered by a new hospital project, a strategic plan refresh, or a major system decision.

Questions we help you answer

- Where do we stand digitally today, and where should we invest first?
- How do our digital decisions line up with our clinical plan, capital plan and opening date?
- What should we do in the next 6 to 12 months?

What you receive

- Digital maturity snapshot across priority domains (current vs. target)
- Prioritized areas of opportunity with recommended next steps
- Three-horizon digital roadmap (Foundation, Build & Integrate, Optimize & Scale)
- Executive summary and readout for leadership

How it works

Remote document review and maturity survey, followed by virtual best-practice and roadmap working sessions with Cleveland Clinic Digital experts. An optional in-person executive visioning workshop (on site or at Cleveland Clinic) aligns leadership on priorities before the final readout.

Phase 1 Discovery and maturity snapshot; Phase 2 Roadmap working sessions; Phase 3 Executive readout. Optional ongoing advisory support.

Expected outcomes

- ✓ Shared leadership view of digital priorities and maturity gaps
- ✓ Sequenced roadmap tied to clinical, capital and opening milestones
- ✓ Clear, owned next steps for the first 6 to 12 months
