Safety, Quality, and Patient Experience (SQPE)

SQPE eLearning Courses

On-demand Cleveland Clinic courses through Healthcare EDU that build safety, quality and patient experience capability across your workforce.

Category	Typical duration	Delivery model
Education & Training	Ongoing access for the membership term	Self-paced Online

Client need

Building a culture of safety and quality depends on every caregiver sharing the same concepts and language, yet releasing large numbers of staff for in-person training is costly and disruptive. Hospitals often lack high-quality, standardized content on SQPE topics and struggle to train staff consistently across shifts and sites.

Requests typically come from quality, nursing education or learning and development leaders seeking scalable training that supports their SQPE improvement priorities.

Questions we help you answer

- How do we train caregivers consistently across shifts and sites?
- Which safety, quality and patient experience topics should every caregiver learn?
- How do we build skills without pulling large numbers of staff off the floor?

What you receive

- Access to the Healthcare EDU library of SQPE-related eLearning courses
- Course recommendations mapped to member SQPE priorities
- Learner enrollment and access setup
- Completion reporting for member administrators

How it works

Caregivers complete courses online at their own pace through Healthcare EDU. Member leaders select the courses that align with their SQPE priorities and track completion across their teams.

Courses are self-paced and vary in length; access continues throughout the Cleveland Clinic Connected membership.

Expected outcomes

- ✓ Consistent SQPE knowledge across caregivers and sites
- ✓ A shared Cleveland Clinic language for safety and quality
- ✓ Scalable training without large-scale staff release
- ✓ Trackable course completion across the caregiver groups the member selects
