Safety, Quality, and Patient Experience (SQPE)

SQPE Train-the-Trainer Programs

Equip your own leaders to teach Cleveland Clinic's communication, reliability and improvement programs, building lasting internal capability.

Category
Education & Training

Delivery model
On-site, Hybrid, Workshop-based

Client need

Culture change in safety, communication and improvement does not scale through external trainers alone; hospitals need internal faculty who can deliver proven programs and sustain them. Requests typically come from CNOs, CMOs, quality and patient experience leaders.

Questions we help you answer

- How do we teach Cleveland Clinic programs with our own faculty?
- Which programs, such as Communicate with HEART, R.E.D.E. or Just Culture, fit our priorities?
- How do we keep training going after Cleveland Clinic's involvement ends?

What you receive

- Communicate with HEART train-the-trainer (all caregivers)
- R.E.D.E. to Communicate train-the-trainer (physicians and APPs)
- High Reliability train-the-trainer
- Just Culture train-the-trainer
- Performance Improvement train-the-trainer
- Trainer materials and facilitation guides for local delivery

How it works

Each program combines eLearning preparation with on-site, workshop-based training led by Cleveland Clinic faculty. Member trainers then deliver the program locally, with Cleveland Clinic available for follow-up support.

Members may select one or more programs; each typically includes eLearning pre-work, an on-site training visit and a follow-up period as trainers begin local delivery.

Expected outcomes

- ✓ Internal faculty able to teach Cleveland Clinic programs
- ✓ Sustainable, locally led training capacity
- ✓ Improved caregiver and provider communication
- ✓ Stronger high reliability, just culture and improvement practices across the organization
