Advisory package across all four domains

All-in-One New Hospital Package

Eight Cleveland Clinic offerings across finance, safety and quality, digital and education, sequenced as one advisory program from design to opening day.

Category
All-in-one package (for hospitals being built)

Delivery model
On-site, Hybrid, Workshop-based

Client need

Opening a new hospital means making finance, quality, digital and workforce decisions at once, often with advisors who do not coordinate, and early choices are expensive to change once construction starts.

Questions we help you answer

- How do we coordinate finance, quality, digital and workforce decisions for a new hospital?
- What needs to happen during design, construction and the run-up to opening?
- How do we make sure every area is ready on opening day?

What you receive

Two offerings from each area, each with the scope in its own profile:

- **Financial planning and modeling (FIN-05):** forecast from opening to steady state
- **Financial reporting (FIN-04):** KPIs and dashboards from day one
- **Safety, Quality, and Patient Experience (SQPE) advisory (SQPE-03):** quality built into governance
- **SQPE guide library (SQPE-04):** mature practice for policies and training
- **Digital strategy (IT-01):** roadmap tied to the opening timeline
- **Digital activation (IT-06):** a safe, on-time go-live
- **Caregiver culture (EDU-04):** onboarding for the founding workforce
- **Simulation training (EDU-05):** practice and systems testing before opening

How it works

1. **Plan (design):** FIN-05, IT-01, SQPE-03
2. **Prepare (construction):** FIN-04, SQPE-04, EDU-04
3. **Activate (run-up to opening):** IT-06, EDU-05

Expected outcomes

- ✓ One coordinated plan across all four areas
- ✓ Early decisions made before they are costly to change
- ✓ Every area ready on the same opening date
