Finance

Finance Transformation & Operating Model

An advisory offering that helps CFOs assess their finance function and design the structure, processes and governance it needs to support the enterprise.

Category
Finance Advisory: Transform Stage (building the right finance organization)

Delivery model
On-site, Hybrid, Workshop-based

Client need

Finance functions built for a smaller organization fall behind: manual workflows slow the close, decision rights are unclear and inconsistent accounts undermine reporting. It sits in the Transform stage of Cleveland Clinic's five-stage finance advisory lifecycle: building the right finance organization ("Do we have the right finance organization?").

Questions we help you answer

- Does our finance function fit the organization we have become?
- Who should decide what, and how should finance be organized?
- What is a realistic, phased path to a stronger finance organization?

What you receive

Start with one module or take on a full transformation:

- **Organization assessment and process maps:** structure, roles, gaps and future-state processes
- **Operating model and governance:** target organization, decision rights and policies
- **Shared services, finance calendar and chart of accounts:** blueprints and definitions
- **Transformation roadmap:** phased plan with a change approach

How it works

1. **Assessment:** on-site discovery and interviews
2. **Future-state design:** design workshops
3. **Roadmap:** refined with executives on-site

Expected outcomes

- ✓ One shared view of the finance organization needed
- ✓ Faster close and planning, with clear decision rights
- ✓ A phased, fundable transformation roadmap
