AI Governance & Responsible AI

Establish the governance, policies and review process to adopt AI safely, ethically and at pace.

CATEGORY	TYPICAL DURATION	DELIVERY MODEL
Digital & Technology Advisory	8 to 12 weeks	Virtual, Hybrid, Workshop-based

01 CLIENT NEED

AI tools are entering hospitals through vendors, platforms and staff experimentation, often without a clear process for review, approval or monitoring. Leaders worry about patient safety, bias, privacy and regulatory exposure while wanting the benefits. Requests usually follow a proposed AI deployment or unmanaged shadow AI.

02 WHY CLEVELAND CLINIC

Cleveland Clinic has run a multidisciplinary AI Task Force since 2021, spanning clinical, informatics, data science, legal, bioethics, compliance, cybersecurity, IT and quality leaders. Its approach follows the NIST AI Risk Management Framework and covers internally developed, vendor and platform AI, with an intake, review and monitoring process designed to enable innovation.

03 WHAT YOU RECEIVE

- AI governance model and multidisciplinary committee design
- Core principles and AI policy recommendations
- AI use-case intake and review process (including model documentation)
- AI inventory / registry approach, including shadow AI
- Bias review and ongoing monitoring framework
- Staff training and patient transparency recommendations

04 HOW IT WORKS

Virtual / Hybrid / Workshop-based | 8 to 12 weeks

Virtual best-practice sessions with Cleveland Clinic AI governance leaders, review of the client's AI policies and current use cases, and written recommendations. An optional in-person AI governance roundtable or tabletop review of live AI use cases.

Phase 1 Current AI landscape and governance review; Phase 2 Governance, policy and process design; Phase 3 Monitoring framework and readout. Optional ongoing advisory as use cases are reviewed.

05 WHAT WE NEED FROM YOU

- Executive sponsor (CEO, CMIO or CIO)
- Inventory of current and planned AI use cases
- Existing data, privacy and IT policies
- Clinical, legal/compliance and IT representatives

06 EXPECTED OUTCOMES

- A functioning AI governance body with clear roles and decision rights
- A standard intake and approval process for every AI use case
- Visibility of all AI in use, including shadow AI
- Ongoing monitoring for performance, bias and unintended impacts
