SQPE eLearning Courses

On-demand Cleveland Clinic courses through Healthcare EDU that build safety, quality and patient experience capability across your workforce.

CATEGORY	TYPICAL DURATION	DELIVERY MODEL
Education & Training	Ongoing access for the membership term	Self-paced Online

01 CLIENT NEED

Building a culture of safety and quality depends on every caregiver sharing the same concepts and language, yet releasing large numbers of staff for in-person training is costly and disruptive. Hospitals often lack high-quality, standardized content on SQPE topics and struggle to train staff consistently across shifts and sites.

Requests typically come from quality, nursing education or learning and development leaders seeking scalable training that supports their SQPE improvement priorities.

02 WHY CLEVELAND CLINIC

Courses are delivered through Cleveland Clinic's Healthcare EDU platform and reflect the practices Cleveland Clinic uses with its own caregivers, so content is grounded in real operational experience rather than theory.

Because courses are self-paced and online, members can reach large numbers of caregivers quickly and consistently, and can pair eLearning with Cleveland Clinic's on-site and train-the-trainer programs for deeper adoption.

03 WHAT YOU RECEIVE

- Access to the Healthcare EDU library of SQPE-related eLearning courses
- Course recommendations mapped to member SQPE priorities
- Learner enrollment and access setup
- Completion reporting for member administrators [confirm availability]

04 HOW IT WORKS

Self-paced Online | Ongoing access for the membership term

Caregivers complete courses online at their own pace through Healthcare EDU. Member leaders select the courses that align with their SQPE priorities and track completion across their teams.
Individual courses typically take [X minutes to X hours] to complete; access continues throughout the Cleveland Clinic Connected membership.

05 WHAT WE NEED FROM YOU

- Learning and development or education lead
- Department leaders to assign courses
- Internet access and protected time for learners

06 EXPECTED OUTCOMES

- Consistent SQPE knowledge across caregivers and sites
- A shared Cleveland Clinic language for safety and quality
- Scalable training without large-scale staff release
- Trackable course completion for [number of] target caregivers
