SQPE Train-the-Trainer Programs

Equip your own leaders to teach Cleveland Clinic's communication, reliability and improvement programs, building lasting internal capability.

CATEGORY	TYPICAL DURATION	DELIVERY MODEL
Education & Training	[X to X] weeks per program	On-site, Hybrid, Workshop-based

01 CLIENT NEED

Culture change in safety, communication and improvement does not scale through external trainers alone; hospitals need internal faculty who can deliver proven programs and sustain them. Requests typically come from CNOs, CMOs, quality and patient experience leaders.

02 WHY CLEVELAND CLINIC

These programs use the curricula Cleveland Clinic applies with its own caregivers, including Communicate with HEART for all caregivers and R.E.D.E. to Communicate for physicians and advanced practice providers, alongside High Reliability, Just Culture and Performance Improvement.

Cleveland Clinic prepares member faculty through a combination of on-site and eLearning instruction, so the member gains internal trainers [confirm certification] and the materials to teach independently.

03 WHAT YOU RECEIVE

- Communicate with HEART train-the-trainer (all caregivers)
- R.E.D.E. to Communicate train-the-trainer (physicians and APPs)
- High Reliability train-the-trainer
- Just Culture train-the-trainer
- Performance Improvement train-the-trainer
- Trainer materials and facilitation guides for local delivery

04 HOW IT WORKS

On-site / Hybrid / Workshop-based | [X to X] weeks per program

Each program combines eLearning preparation with on-site, workshop-based training led by Cleveland Clinic faculty. Member trainers then deliver the program locally, with Cleveland Clinic available for follow-up support. Members may select one or more programs; each typically includes eLearning pre-work, an on-site training visit and a follow-up period as trainers begin local delivery.

05 WHAT WE NEED FROM YOU

- Selected trainer candidates (caregivers, physicians or leaders depending on program)
- Executive sponsor
- Training space and protected time
- Plan for local rollout after training

06 EXPECTED OUTCOMES

- Internal faculty able to teach Cleveland Clinic programs
- Sustainable, locally led training capacity
- Improved caregiver and provider communication
- Stronger high reliability, just culture and improvement practices across the organization
