# Strategic Finance & Growth Advisory

*Financial evaluation of growth decisions, from market sizing and feasibility to business cases, investment prioritization and a phased implementation roadmap.*

| CATEGORY | TYPICAL DURATION | DELIVERY MODEL | PRODUCT OWNER |
|---|---|---|---|
| Finance Advisory: Plan Phase | 4 to 12 weeks | Hybrid, Workshop-based | IEM Finance Advisory Connected & Advisory Services |

## 01 CLIENT NEED

New facilities, service lines, programs and market entries compete for limited capital and executive attention, and they are often advanced on enthusiasm rather than a clear financial picture. Boards, investors and government sponsors need to know whether an initiative is viable, which opportunities to pursue first, and how an approved plan will be funded and sequenced over several years.

The offering sits within the Plan phase of the Cleveland Clinic Healthcare Financial Advisory Lifecycle, which answers the client question "Can we do this?" It is typically requested by new market entrants and organizations pursuing growth initiatives, new facilities or service line expansion, and can be scoped as a single business case or a full growth agenda.

## 02 CLEVELAND CLINIC VALUE PROPOSITION

Cleveland Clinic brings the discipline of an operating health system to growth decisions. Our finance advisors build market assessments, feasibility studies and business cases grounded in how hospitals actually run, linking demand, volumes, staffing, reimbursement and capital to realistic financial outcomes.

Clients gain access to Cleveland Clinic's experience planning, funding and delivering new services, programs and facilities over multiple years, combined with an international perspective from Cleveland Clinic International & Emerging Markets engagements across diverse healthcare markets.

## 03 KEY DELIVERABLES

- Market assessment and demand forecast by service, with population and utilization assumptions
- Feasibility assessment of operational and financial viability, risks and conditions for success

- Business case or pro forma with ROI, NPV and IRR views and sensitivity analysis
- Service line or new program analysis with volume, revenue, cost and resource estimates
- Growth opportunity assessment and investment prioritization matrix with a repeatable scoring framework
- Multi-year implementation roadmap with phasing, milestones, dependencies and a funding view by year
- Executive summary and go or no-go recommendation for the board or investment committee

## 04 DELIVERY MODEL

### Hybrid / Workshop-based

The engagement opens with a virtual kickoff and a structured data request, followed by interviews with key stakeholders. Analysis and modeling are completed through regular virtual working sessions, with interim findings reviewed alongside the client team. It concludes with an executive readout of findings and recommendations, delivered on-site or virtually. Modules are selected at scoping, so a single business case and a full growth agenda follow the same approach.

## 05 TYPICAL DURATION

### 4 to 12 weeks

Typically delivered in three phases: discovery and data collection; analysis and modeling; recommendations and executive readout. A single business case or program evaluation runs 4 to 8 weeks; a market assessment, multi-option growth strategy or implementation roadmap extends toward 12 weeks. Final timing depends on data availability and scope.

## 06 RESOURCE REQUIREMENTS

### CLEVELAND CLINIC TEAM

- Director / Executive Sponsor: 5 to 10%
- Assistant Director / Engagement Lead: 10 to 25%
- Manager / Workstream Lead: 20 to 40%
- Senior Analyst: 30 to 60%
- Analyst: 20 to 50%
- Admin / Project Support: up to 10%

### CLIENT TEAM AND INPUTS

- Executive sponsor with decision authority
- Finance lead or day-to-day point of contact
- Timely access to financial, operational, market, volume, reporting and staffing information
- Stakeholder availability for interviews, working sessions and reviews
- Timely review and feedback on draft deliverables

## 07 EXPECTED OUTCOMES

- Evidence-based view of market opportunity and future demand
- Independent view of viability, with the risks and conditions required for success
- Board-ready business case showing which assumptions most affect the investment outcome
- Prioritized growth and investment agenda aligned to strategic priorities and available capital
- Agreed, phased roadmap with clear milestones and accountability for execution
- Investment decisions supported by validated, documented assumptions
