Clinical Observerships & Visiting Programs

Observation-based visiting programs that give physicians, nurses, pharmacists and trainees first-hand exposure to Cleveland Clinic practice in the United States and Abu Dhabi.

CATEGORY	TYPICAL DURATION	DELIVERY MODEL	PRODUCT OWNER
Education & Training	1 to 4 weeks, by program	On-site, Hybrid	Cleveland Clinic program hosts Center for International Medical Education; Nursing Institute; Pharmacy Education

01 CLIENT NEED

Clinicians, leaders and trainees often want to see how Cleveland Clinic delivers care before adapting those practices at home, but each professional group needs a different kind of placement. Best fit for organizations sending medical students, residents, fellows, practicing physicians, experienced nurse leaders, pharmacy professionals or early-career surgeons for focused, observation-based exposure aligned to defined learning or development goals.

Intended audience: Varies by program (see Key Deliverables). Participation is application-based and limited by specialty availability.

02 CLEVELAND CLINIC VALUE PROPOSITION

Cleveland Clinic offers structured, observation-based visiting programs in Cleveland and at regional sites, Cleveland Clinic Florida and Cleveland Clinic Abu Dhabi. Participants observe clinical, surgical and operational practice, attend rounds and teaching conferences, and gain exposure to leadership, accreditation and operational excellence, without direct patient care.

Programs range from broad exposure for medical students to objective-based, one-on-one preceptorships and tailored mentorship for nurse leaders, so participants bring transferable practices back to their home

institutions.

03 KEY DELIVERABLES

- International Visitor Program: Observership. Medical students; 4 weeks in the United States; patient rounds and teaching conferences in medicine or surgery
- International Visitor Program: Preceptorship. Residents, fellows and practicing physicians; 1 to 2 weeks; one-on-one, objective-based clinical, surgical and operational observation
- Visiting Nurse Scholars. Nurses with 3+ years of experience; 1 to 4 weeks; mentorship and shadowing aligned to development goals; proficiency in English is helpful
- Pharmacy Ambassador Program. Pharmacy professionals and leaders; 1 to 2 weeks at Cleveland Clinic and regional sites; clinical pharmacy, operations, accreditation and residency exposure
- LATAM Ortho CCF Observership. Sponsored program for Latin American orthopaedic trainees and early-career surgeons; 4 weeks at Cleveland Clinic Florida with a virtual component
- CCAD Observership. Students, trainees and licensed clinicians; 2 to 4 weeks at Cleveland Clinic Abu Dhabi in Digestive Diseases and Heart, Vascular & Thoracic specialties

05 TYPICAL DURATION

1 to 4 weeks, by program

Preceptorship and Pharmacy Ambassador Program: 1 to 2 weeks. Visiting Nurse Scholars: 1 to 4 weeks. CCAD Observership: 2 to 4 weeks. International Visitor Program Observership and LATAM Ortho: 4 weeks. Placements are limited and specialty dependent, and availability is confirmed at application.

06 RESOURCE REQUIREMENTS

CLIENT TEAM AND INPUTS

- Observational only: no direct patient care, hands-on activity or research
- Application review and specialty availability; international compliance review for the International Visitor Program
- Visa eligibility (typically B1/B2 for U.S. programs; visit visa for Cleveland Clinic Abu Dhabi)
- English-language application documents for the International Visitor Program; preceptorships are not designed for international medical graduates (IMGs) seeking U.S. clinical training
- Program fees: IVP Observership $500 per participant; IVP Preceptorship $1,250 to $7,000 per participant per week; Visiting Nurse Scholars variable, based on application; LATAM Ortho sponsored; Pharmacy Ambassador and CCAD Observership to be confirmed

07 EXPECTED OUTCOMES

- First-hand exposure to Cleveland Clinic practices and care models
- Practical skills and transferable workflows participants can apply at their home institution
- Targeted skill development against defined learning objectives
- Clearer career direction through exposure to U.S. clinical practice
- Long-term capacity building at the participant's home institution
