Education & Training	Single session to multi-phase engagement	On-site, Workshop-based	Cleveland Clinic program hosts Simulation and Advanced Skills Center

01 CLIENT NEED

Licensed professionals and teams need to practice procedures, teamwork and life support in a safe environment, and organizations building their own simulation capability need help with curriculum and program design, systems testing, accreditation readiness and faculty development. Best fit for organizations seeking simulation courses, workforce upskilling, train-the-trainer support or simulation program development.

Intended audience: Healthcare professionals, educators, simulation leaders and organizations.

02 CLEVELAND CLINIC VALUE PROPOSITION

Cleveland Clinic's Simulation and Advanced Skills Center reports 48,000 learner encounters and more than 2,500 courses each year, using high- and low-fidelity manikins, procedural trainers, VR and mixed reality, standardized patients, in situ training, surgical simulation and resuscitation education to strengthen technical skills, teamwork and patient safety.

International engagements can assess needs, implement solutions and build sustainable local capacity, and Cleveland Clinic Abu Dhabi offers customizable, specialty-specific simulation training in the region.

03 KEY DELIVERABLES

- Simulation courses in procedural skills, team-based scenarios and life support, customized by specialty
- Workforce upskilling and in situ training at Cleveland Clinic or the client site
- Systems testing of clinical systems, spaces and workflows
- Simulation curriculum and program design, including accreditation readiness
- Faculty development and train-the-trainer support
- CCAD Simulation-Based Training. Licensed healthcare professionals; single-session to multi-day specialty training at Cleveland Clinic Abu Dhabi
