CC Connected SQPE Core Program

A structured, year-round safety, quality and patient experience program that benchmarks your organization against Cleveland Clinic standards and keeps improvement on track.

CATEGORY	TYPICAL DURATION	DELIVERY MODEL	PRODUCT OWNER
Clinical Advisory	12-month cycle, renewed annually	On-site, Hybrid	CC Connected SQPE Team

01 CLIENT NEED

Hospitals joining a clinical affiliation need more than a one-time review: they need a shared baseline, reliable metric definitions and a regular cadence that keeps safety, quality and patient experience (SQPE) priorities visible to leadership. Many lack standardized data collection or consistent metric definitions, which makes performance hard to compare or improve.

This program is the foundation required of all Cleveland Clinic Connected members. It begins at the start of membership, typically sponsored by the CEO, CMO or CNO, and continues as the core governance rhythm of the affiliation.

02 CLEVELAND CLINIC VALUE PROPOSITION

Cleveland Clinic brings a mature SQPE infrastructure built through decades of operating a large, multi-hospital health system, including established metric definitions, data review processes and improvement methods used across its own enterprise.

Members gain direct access to Cleveland Clinic SQPE experts who assess, review and coach on an ongoing basis, translating proven practices into the member's own context rather than delivering a single static report.

03 KEY DELIVERABLES

- Initial on-site organizational SQPE assessment and written report
- Review of priority SQPE metric definitions with the member team

- Data collection and quarterly metric performance submission process
- Quarterly SQPE review meetings with Cleveland Clinic experts
- Annual SQPE reassessment and written report with updated recommendations

04 DELIVERY MODEL

On-site / Hybrid

The program begins with an on-site assessment by the Cleveland Clinic SQPE team, followed by quarterly review meetings built around the member's submitted metric data. An annual reassessment measures progress and resets priorities for the following year.

05 TYPICAL DURATION

12-month cycle, renewed annually

Initial on-site assessment within the first [X] months of membership; quarterly reviews throughout the year; annual assessment and report at the close of each membership year.

06 RESOURCE REQUIREMENTS

CLEVELAND CLINIC TEAM

- SQPE engagement lead
- Quality and patient safety subject matter experts
- Nursing quality expert
- Data and metrics analyst
- Cleveland Clinic Connected program manager

CLIENT TEAM AND INPUTS

- Executive sponsor (CEO, CMO or CNO)
- Quality and patient safety lead
- Data owner responsible for quarterly metric submission
- Access to policies, data and clinical areas during the on-site assessment

07 EXPECTED OUTCOMES

- A documented SQPE baseline compared with Cleveland Clinic standards
- Standardized definitions for priority SQPE metrics
- Reliable quarterly performance data visible to leadership
- A prioritized, year-over-year improvement plan
- Measurable progress on the 3 to 5 priority measures each member selects, against targets the member sets
